**CWE Flow-Based Market Coupling – Publication of complete translation table for all 11 characters**

Dear Market Parties,

A preliminary translation table was published a few weeks ago, following feedback from market parties on the 25th of January on the pending republication because of errors found in the fixed labeling process of CBCO's.

This preliminary table covered only the CBCO part of the fixed IDs (see below).

- XX –XXXXX–X–XXX (Hub – CBCO – Fmax /Spanning / Fallback–Enlarged and Virtual CBs)

In order to optimally inform market parties a comprehensive approach is used which involved the publication of a complete translation table for all 11 characters since go-live of CWE FB MC.

In the process an additional error was found. This required a republication of historical data, which will be finalized by the middle of next week.

This full translation table now is available via Support > CWE FBMC > CWE FBMC > Documentation > Translation table_corrected CBCO mapping_complete.xlsx.

We apologize for the slight delay of our response.
